All	Comment	The council recognises the work involved to date in producing the HVNDP and the work that has been undertaken to address the council's previous comments on the First Draft Plan 2016-2031.	Noted.	No change.
All	Comment	We also note your excellent website which is clear, straight forward to use and provides easy access to all relevant documents.	Noted.	No change.
All	Comment	The council still has concerns however, particularly relating to general non-conformity with both the National Planning Policy Framework and the Kirklees Local Plan and the lack of supporting evidence and policy justification. The imprecise nature of some policies means it is difficult to understand how they are intended to be interpreted and implemented.	Accepted - see detailed changes below.	No further change to detailed amendments set out below.
All	Comment	It must also be noted that the comments provided by Kirklees Council are in relation to the use of the HVNDP in determining planning applications where Kirklees Council is the relevant	Accepted.  Detailed comments have also been submitted by the Peak District National Park	No further change to detailed amendments set out below.

		planning authority. The HVNDP makes no distinction between areas within and outside the Peak District National Park where the Peak District National Park Authority is the relevant planning authority. Both authorities will need to be involved in the process of submitting the HVNDP for examination.	Authority and these will also be addressed in amendments to the NDP.	
All	Comment	These comments should also be read alongside the Council's comments on the Holme Valley Neighbourhood Development Plan 'Comments on First Draft for Public Consultation 2018' provided to the Holme Valley Parish Council on 17 <sup>th</sup> August 2018 and alongside the minutes of the meeting held on 19 <sup>th</sup> December 2018 between the Council and members of the Holme Valley Neighbourhood Plan Steering Group.	Noted.	No change.
115 124	Comment	<b>Non-planning matters</b> - Non-planning matters are still contained in some policy areas, including (but not limited to) the use of single-use plastics (HVNDP Draft Policy 12), the introduction of 20mph speed limits and the introduction of weight limits (HVNDP Draft Policy 11). An example of a Neighbourhood Plan which has an emphasis on HGV weight limits but	Accepted - see responses to detailed points below.	No further change to detailed amendments set out below.

		<p>recognises that it is not a planning matter is Little Mitton Neighbourhood Plan</p> <p><a href="http://www.southoxon.gov.uk/sites/default/files/Little%20Milton%20Neighbourhood%20Plan%20Referendum%20Version.pdf">http://www.southoxon.gov.uk/sites/default/files/Little%20Milton%20Neighbourhood%20Plan%20Referendum%20Version.pdf</a></p>		
102 124	Comment	<p><b>Consistency with national policy</b> - Inconsistencies are still contained in some policy areas, including (but not limited to) the designation of Local Green Space (HVNDP Draft Policy 10) and support for wind turbines (HVNDP Draft Policy 12).</p>	Noted.	No further change to detailed amendments set out below.
82 91	Comment	<p><b>General conformity with the Local Plan</b> - While many of the policies appear to be in general conformity with the Local Plan, the wording of some is so imprecise that judgement of the degree of conformity is difficult. Actual non-conformity with the Local Plan is evident, including (but not limited to) Draft Policy 6 which appears to contradict LP6 Safeguarded Land and LP61 Urban Green Space, and Draft Policy 8 which appears to contradict LP13 Town Centres Uses. There is a lack of general understanding of green belt</p>	Noted.	No further change to detailed amendments set out below.

		policy. There is frequent reference to 'rural areas' which has not been defined in the context of the HVNDP. The Council recommends that regard be had to Local Plan paragraph 19.31 to avoid any confusion in terms of infilling in villages.		
40 61 91 82 124	Comment	<p><b>Evidence justification</b> – Policy areas that lack sufficient evidence include (but is not limited to) Draft Policies 1 and 2 and Draft Policy 8. There is a lack of evidence underpinning Draft Policy 6 relating to housing need and Draft Policy 12 relating to support for wind turbines. The council is also concerned that some of the supporting evidence justifies Parish Council actions rather than the policies. An example of a Neighbourhood Plan which distinguishes between planning policies and community actions is Morpeth Neighbourhood Plan</p> <p><a href="https://www.northumberland.gov.uk/NorthumberlandCountyCouncil/media/Planning-and-Building/planning%20policy/Morpeth-Neighbourhood-Plan-Made-May-2016.pdf">https://www.northumberland.gov.uk/NorthumberlandCountyCouncil/media/Planning-and-Building/planning%20policy/Morpeth-Neighbourhood-Plan-Made-May-2016.pdf</a> Neighbourhood Plans do not have to separate community/town/parish council actions</p>	Noted.	No further change to detailed amendments set out below.

		<p>into a separate section as they can be referenced through the plan but a review of Examiner Reports demonstrates that they should be clearly distinguished e.g. Ripon Neighbourhood Plan Examiners Report.</p>		
All	Comment	<p><b>Using the Holme Valley Neighbourhood Plan</b> - The Holme Valley Neighbourhood Development Plan cannot be interpreted with certainty and is therefore considered to be contrary to NPPF paragraph 16 criterion d) and NPPG paragraph 041. The Plan lacks clarity of meaning and is in places inconsistent, repetitive, contradictory, unreasonable, overly prescriptive and unenforceable. The HVNDP appears to have been written in large parts as a Local Plan, rather than a plan helpful to the objective of retaining an area's identity. This has resulted in a significant degree of overlap with the Kirklees Local Plan and risks confusion for both applicants and officers. The format of the policies varies with the use of numbers, headings and sub headings which makes referencing parts of policies difficult. Issues are dispersed among different policies and reasoned</p>	Noted.	No further change to detailed amendments set out below.

		justification is mixed in with policy wording.		
All	Comment	The HVNDP needs to be updated to reflect the new Local Plan policy numbers and to remove reference to the 'emerging' plan and policies;	Noted.	Find all references to Local Plan and update to refer to policies in adopted version.
General	Comment	The Holme Valley Parish Council is not the local planning authority and does not have the powers to control, enforce or implement highway infrastructure or other infrastructure projects;	Noted.	Find references to highway and infrastructure projects and improve clarity in relation to of PC and Highways Authority.  Insert at 4.10.2 'Holme Valley Parish Council is not the local planning authority and does not have the powers to control, enforce or implement highway infrastructure or other infrastructure projects. '
General	Comment	The new boxes containing reference to Local Plan policies are a useful addition. These boxes could be used to direct applicants/developers to the relevant Local Plan policy but need to be comprehensive.	Noted.	Check all Local Plan policy boxes and ensure that they are comprehensive.
General	Comment	Development briefs: Given the emphasis in the HVNDP on character the plan could take the opportunity to provide design guidance to inform the development of the remaining allocated development sites.	Noted. The Parish Council does not intend to prepare design guidance to inform the development of the remaining site allocations. This is	No change.

			considered to be a matter for Kirklees Council. The policies in the NDP provide design policies for development proposals across the NDP area.	
General	Comment - additional policy proposed.	Specific Biodiversity Policy: The HVNDP could consider a specific biodiversity policy requiring a measurable biodiversity net gain as a result of development in line with the National Planning Policy Framework and National Planning Practise Guidance and the government's ambitions as set out in <a href="https://www.gov.uk/government/consultations/biodiversity-net-gain-updating-planning-requirement">https://www.gov.uk/government/consultations/biodiversity-net-gain-updating-planning-requirement</a> .	Noted. It is important not to duplicate national Kirklees planning policies. It is accepted that the neighbourhood area has significant wildlife and habitat assets however so it may be necessary to review the biodiversity related criteria in Policy 12.	Review Policy 12 biodiversity criteria and consider rewording or provide a new policy - see below.
General	Comment	Landscape Character Areas would be better in an Appendix with the Parish Council picking out the distinctive characteristics that apply to the consideration of applications in each area.	Accepted.	Move Landscape Character Areas information to an appendix - see 6. Below.

Table 1B Detailed General Comments from Kirklees Council

2.0 Planning Context for Holme Valley NDP					
1.	Page Number	Paragraph/ Policy Number	Comments, including whether the policy and supporting text conform to National Planning Policy Framework and National Planning Practice Guidance, the Kirklees Local Plan and EU obligations (if relevant), whether there is sufficient supporting evidence, inconsistencies between policies and whether the policy can be implemented.		
2.	Page 19	2.7/2.8 and others	It may not be advisable to embed web links into the document as they may not be available for the life of the plan.	Accepted.  The Examiner may require links to all referenced documents but these could be provided by Kirklees Council prior to od during the examination.  The HVNDP webpages will be updated to include all referenced documents at submission.	Remove all Kirklees Council weblinks in NDP.
3.	Page 23	Objective B	Clarification is needed that the views to be protected are public views rather than private views.	Accepted.	<b>Amend NDP</b>  Insert " <b>public</b> " before "views" in Objective B.

4.	Page 23	Objective C	It may add clarity if the objectives of housing provision and general building design are in separate objectives.	Not accepted.  The Steering Group and Parish Council consider that it is preferable to retain this as a single objective.	No change.
<b>4.1 Protecting Local Character</b>					
5.	Page 29	Para 4.1.15	The maps associated with Appendix 7 are not OS based so cannot be used with certainty to locate a proposal within any particular area.	The map was reproduced from the AECOM Holme Valley Heritage and Character Assessment report.  The Steering Group has revised and improved Map 2 to improve clarity.	Insert new map with improved clarity.
<b>4.2 Landscape Character Areas</b>					
6.		Draft Policies 1 and 2: <b>General comment</b>	The Council consider that Draft Policy 1 and Draft Policy 2 contravene NPPG paragraph 041 and NPPF paragraph 16 criterion d). Additionally, NPPF Chapter 12 paragraph 125 states that plans should “ <i>set out a clear design vision and expectations, so that applicants have as much certainty as possible about what is likely to be acceptable</i> ” and that “ <i>neighbourhood plans can play an important role in identifying the special qualities of each area and explaining how this should be reflected in development</i> ”. Draft policies 1 and 2 are imprecise, unclear and difficult to apply. The length and complexity of both these policies make them	Noted.  (NPPG paragraph 041 states: How should the policies in a neighbourhood plan be drafted? <i>A policy in a neighbourhood plan should be clear and unambiguous. It should be drafted with sufficient clarity that a decision maker can</i>	No further change to detailed changes discussed with Kirklees' Council prior to Submission.

		<p>more akin to design codes.</p> <p>The Heritage and Character Assessment (HCA) contained in Appendix 7 is a description of the landscape of the valley and the dispersal of settlement and how they relate to local topography. This information has been summarised in the HVNDP at pages 31 to 38 as key characteristics of each landscape character area, but Draft Policy 1 points directly to the HCA itself. This means that applicants must refer to the stand alone document in order to assess how their application complies with the information contained within it. This brings into question the usefulness of the summaries contained in the HVNDP, unless those summaries could be used more effectively to help both applicants and officers by picking out those elements the Parish Council would like to promote in each particular area. As it stands it is confusing. For example, the HCA contains reference to key views to Castle Hill, Emley Moor mast, Holme Moss transmitting station and others, while the summaries refer only to views to Castle Hill.</p>	<p><i>apply it consistently and with confidence when determining planning applications. It should be concise, precise and supported by appropriate evidence. It should be distinct to reflect and respond to the unique characteristics and planning context of the specific neighbourhood area for which it has been prepared.</i></p> <p>Paragraph: 041 Reference ID: 41-041-20140306 Revision date: 06 03 2014)</p>	
7.	Policy 2	<p>The purpose of Draft Policy 2 would appear to be to control the more detailed character of built form within the HVNDP area, yet directs applicants only to look at the Landscape Character Areas without specifying whether this is the summaries or the stand alone HCA. However, neither the summaries nor the HCA are sufficiently detailed to allow an assessment for the purposes of criteria a, b and c of Draft Policy 2 point 1. In addition, criteria c refers to 'historic landscape character', which refers to a policy area that</p>	<p>Noted - see detailed response below.</p>	<p>No further change.</p>

KIRKLEES COMMENTS			PARISH COUNCIL CONSIDERATION	AMENDMENTS TO NDP	
			would sit more comfortably in Draft Policy 1, but also refers to 'historic' landscape character, as separate from 'landscape character', and for which no background information or guidance has been provided.		
8.		Policies 1 and 2	Both Draft Policy 1 and Draft Policy 2 contain a mix of elements relating to landscape character and to the built form, which would be better separated into distinct policies.	Noted - see detailed response below.	No change.
9.		Policies 1 and 2	Policies 1 and 2 could clarify that views from <i>public</i> vantage points should be protected, whereas private views, over land not in the ownership of the viewer, cannot be protected by the planning system.	Noted - see detailed response below.	No change.
10.	Page 30	Map 2	The map cannot be used with any certainty to determine which LCA a site falls within. The more detailed maps contained in Appendix 7 are not OS based and are also not suitable for the purpose stated.	Noted. See 5. Above.	No further change.
11.	Page 31	Landscape Character Areas	<p>The descriptions used in section 4.2 are inconsistent and as they are silent on some issues it is not clear how an applicant would comply with this policy. For example: the same headings are not used within each LCA. LCA1 refers to 'land use and cover' and 'settlement pattern and built form' only, but LCA2 also includes 'views'. LCA3 refers to the same 2, but includes 'greenspace and public realm' and omits 'views'. Appendix 7 includes more headings, including 'movement and connectivity' and 'heritage assets', while the policy is silent on these even though the policy refers the applicant to the full document at Appendix 7.</p> <p>The LCA descriptions in section 4.2 are silent on the key characteristics of transport corridors, but having regard to</p>	Noted. 12.	Page 37-38		Hepworth is included in LCA7 and LCA8.	Noted. Hepworth is on the boundary of 2 LCAs.	No change.
<b>Draft Policy 1: Protecting and Enhancing the Landscape Character of Holme Valley</b>					
13.		Draft Policy 1: <b>General Comments</b>	<p>This policy is in general conformity with national policy. However, its use as a Development Management policy is considered to contravene NPPG (paragraph 041) and NPPF paragraph 16 criterion d). Points are imprecise, unclear and difficult to apply.</p> <p>It would be helpful if this policy could be worded to refer to the positive and characteristic attributes of a place. Suggested change: <i>"New development in Holme Valley should protect and enhance the local landscape character of each Landscape Character Area as identified and described in the Heritage and Character Assessment (2016). Where possible proposals should retain and positively respond to those elements of the relevant Landscape Character Area which contribute to the distinct identity of the area."</i></p>	<p>Accepted.</p> <p>The Policy wording has been discussed with officers at Kirklees Council and amended.</p>	<p><b>Amend Policy 1.</b></p> <p><b>Change first paragraph to:</b></p> <p><b>'Where possible proposals should retain and positively respond to those elements of the relevant Landscape Character Area which contribute to the distinct identity of the area as described in the Holme Valley Heritage and Character Assessment report. 14.	Page 40	Draft Policy 1 <b>1<sup>st</sup> &amp; 2<sup>nd</sup> Paragraphs</b>	The policy states that all applications should have regard to the LCAs but then goes on to give 12 additional criteria that all applications must also have regard to. This sets out the characteristics which have been considered in the identification of the various LCAs and the second paragraph of Policy 1 could be deleted and replaced with more precise wording reflecting the characteristics identified and described in the HCA.</p>	
15.		Draft Policy 1	<p>It is unclear whether applicants must have regard to the summary provided at pages 31-38 or to the Heritage and Character Assessment provided at Appendix 7. There is imprecision in terms of how development proposals will be required to 'demonstrate' consideration of the matters referred to.</p>	<p>Accepted.</p> <p>See 14 above for changes to the Policy wording. 17.		Draft Policy 1	Some of the numbered points are not concerned with design and siting issues, especially points 1 and 2.	<p>Accepted.</p> <p>See below. Points 1 and 2 should be deleted.</p>	No further change.
18.	Page 40	Draft Policy 1	Point 1: Should be removed. This is an objective not a policy. Relates to the principle of development while the policy is concerned with addressing design issues. In addition it is not in conformity with the NPPF or the adopted Kirklees Local Plan as it suggests through footnote 10 that development in the green belt is a priority. It could also have the unintended consequence of prioritising development in overwashed settlements in the green belt.	Accepted.	<p><b>Amend NDP</b></p> <p>Delete point 1.</p>

	KIRKLEES COMMENTS		PARISH COUNCIL CONSIDERATION	AMENDMENTS TO NDP	
19.		Draft Policy 1	Point 2: Unnecessary as repeats national and local policy. If retained the list of Local Plan policies should be removed.	Accepted.  <b><u>Amend NDP</u></b>  Delete 2.	
20.		Draft Policy 1	<p>Point 3: This point is unnecessary given that matters relating to views should already have been taken into account under paragraphs one and two of Draft Policy 1.</p> <p>It is unclear how point 3 should be used in determining a planning application. Is the view that has to be respected from the site outwards or from any part of the built-up area outwards? At what point does a view become significant? How should an applicant determine whether an area is moorland or moorland fringe? Is it only areas of moorland or moorland fringe that have to be protected (consistency issue with paragraphs 1 and 2).</p> <p>At present it reads that any proposal that enhances or promotes views will be supported so requires the addition of the words; 'subject to other policies'. This point also refers to the need to take into account Conservation Area Appraisals. However, this is more appropriate to be considered under Draft Policy 2. If retained the Council suggests that all the text after 'Conservation Area Appraisals' should be deleted.</p>	<p>Partially accepted.</p> <p>The public views are an important and highly valued attribute of the Holme Valley NDP area.</p> <p>Amend the Policy to refer to "public views" and delete text after Conservation Area Appraisals as suggested.</p> <p>The remaining text referring to the Conservation Area Appraisals and the text which the Council suggests should be deleted could be moved to Policy 2.</p> <p>(As Policy 2 refers to the Conservation Areas it may make more sense perhaps to delete the text after "Heritage and Character Assessment")</p>	<p><b><u>Amend NDP</u></b></p> <p>The paragraph now reads:</p> <p><b>1. Development should respect long distance public views from development to the upland areas of CA 1: Wessenden Moors, CA 2: Holme Moorland Fringe and CA 3: Hade Edge Upland Pastures and protect public views towards any significant local landmarks as identified in the Heritage and Character Assessment report. In addition, views across the Valley must be considered, including from other areas looking towards the development scheme and proposals should pay particular regard to any long distance visual impacts on approaches to settlements, and along through routes. 21.		Draft Policy 1	<p>Point 4: It is unclear if this policy is intended to apply only to agricultural buildings in the green belt as LP54 only applies in the green belt.</p> <p>Duplicates point 2 in respect of LP54. Unclear in relation to what would be 'appropriate' screening and landscaping as this is not explained in the justification. Unnecessary detail in relation to colours and 'tones'. Unclear as to what is meant by 'roof spans having a variation in heights'.</p>	<p>Accepted.</p> <p>Amend Criterion 4 as suggested.</p>	<p><b><u>Amend NDP.</u></b></p> <p>Provide further explanatory text to explain screening and colours in supporting text. 					wood, and neutral colours such as earth browns and soft greens can reduce visual impacts and are encouraged.'
22.		Draft Policy 1	Point 5: Unclear whether the protection of dry stone walls is intended to apply everywhere even if the Heritage and Character Assessment is silent.	Accepted.  Revise criterion 5 to improve clarity.	<u>Amend NDP.</u>  This now reads: <b>'3. Boundary treatments should be sensitive to the relevant Landscape Character Area. 23.		Draft Policy 1	Point 6: It is suggested this point is not necessary as it exactly repeats part of Local Plan policy LP33 Trees (paragraph 2). Also repeated at HVNDP Draft Policy 12 'Green Infrastructure and Biodiversity' section (point 2).	Accepted.  Amend 6.	<u>Amend NDP.</u>  This now reads: <b>'5. Regard should be had to the location, setting, species height, planting density and need for on-going maintenance and management, particularly in relation to future resilience linked to climate change.'
24.			Point 7: Should this read 'New residential development should include pedestrian linkages to existing tracks and routes'. Not necessary to specify packhorse routes and long distance footpaths. Unclear as to whether this will apply to all residential development whatever the size. May not be relevant to all schemes.	Accepted.  Amend criterion 7 as suggested.  This should refer to "major" development which is defined in the NPPF. This	<b><u>Amend NDP.</u></b>  This now reads: ' <b>4. 				should be amended to refer to all major development - not just residential.	
25.			<p>Point 8: This point is unnecessary as it repeats the general intentions of Local Plan policies LP30 Biodiversity and Geodiversity, LP33 Trees and LP23 Core Walking and Cycling Network. It does not add any specific local detail. It is unclear what is meant by 'green corridors' in the context of the Holme Valley and these are not identified in the HVNDP. Green Corridors were identified in the Kirklees UDP but these have since been replaced in the Local Plan by the Core Walking and Cycling Network and the Wildlife Habitat Network. The strategies referenced in this point have now been superseded by the Local Plan with the exception of the Biodiversity Strategy which is not directly relevant to planning but sets out the council's approach to biodiversity in delivering its services.</p> <p>Suggested change: Delete point 8.</p>	<p>Accepted.</p> <p>Delete criterion 8.</p>	<p><b><u>Amend NDP.</u></b></p> <p>Deleted. Page 87	Draft Policy 7 <b>General comment</b>	<p>It would be helpful to explain where the thresholds for business sizes has been derived from, as would reference to the evidence that underpins this section.</p> <p>The term 'business' should also be clearly defined; does it relate to all 'B' class uses for example. There does not appear to be any supporting text as to why the policy is restricted to certain sizes of business. 'Micro' and 'small' are presumably derived from the EU definition of SMEs, but the EU definition of SMEs also includes medium sized businesses which appear to be excluded from this policy. The policy appears to apply only to small business but the use of the word 'particularly' implies this is not a closed list. Clarity is required.</p> <p>Given the first clause 'Subject to Green Belt policies' this policy only applies in the green belt. Reference to the green belt should be removed from the first paragraph and a sentence at the end of the policy added: <u>"In all cases where development is proposed in the Green Belt regard must be had to the relevant local and national planning policy."</u></p> <p>It is especially important to remove reference to a general support for business development on a greenfield site adjacent to a 'main settlement, village or group of buildings' (imprecise) if the site is within the green belt.</p> <p>What is meant by 'sustainable expansion'?</p> <p>As it reads all 7 criteria need to be met for the proposal to be supported.</p>	<p>Accepted.</p> <p>Insert reference for business thresholds if retained.</p> <p>All criteria (as amended) should be met.</p>	<p><b><u>Amend NDP.</u></b></p> <p>See below.</p>

It lacks evidence and supporting text and may be unreasonable, for example in terms of the control over street lighting. It is imprecise for decision makers in terms of what are the measures of ‘adequate provision for pedestrians’, ‘sufficient cycle and car parking’, ‘walking distance’, ‘useful signage’ and ‘sustainable street lighting’. Seating and litter bins provide extra detail beyond the Local Plan and should be supported by justification text. Some of the considerations in this criteria repeat Local Plan policy LP13 (Town Centre Uses) which refers to ‘All proposals shall be inclusive for all users and be attractive to pedestrians, cyclists and public transport users.’”</p> <p>Point 2 references adequate seating which may be better placed with Draft Policy 5 relating to high quality public realm.</p> <p>Paragraph 3 – point 3: This criteria is not necessary as it repeats Local Plan policies LP13 (Town Centre Uses) and LP14 (Shopping Frontages). It is not clear what is meant by ‘retail uses’ for the purposes of this criteria. If it is Class A1 uses this should be explained in the justification text. This criteria also lacks clarity in respect of what consideration should be given to development within the local centres as they do not have identified primary shopping areas in the Local Plan.</p> <p>Paragraph 3 - point 4: For town centres this point repeats the intention of Local Plan policy LP15 (Residential Use in Town Centres) in terms of supporting the re-use of upper</p>		<p>as seating and pavements, sufficient cycle and car parking (including electric charging points) and public transport facilities within walking distance, clear and useful signage, facilities for the disposal of litter and sustainable street lighting.</p> <p><b>3. 'Other uses' are not defined and these should also consider impact on adjoining uses.</p> <p>Paragraph 3 – point 5: It would be helpful to provide guidance in the justification text on what is meant by 'distinctive and detailed features' to provide a decision maker with clarity of how to apply this consideration.</p> <p>Paragraph 3 - point 6: Needs justification text to explain how business premises should 'contribute towards a varied and interesting frontage'. It is unclear how will this will be judged and on what basis.</p> <p>Paragraph 4: This criteria is inconsistent with the flexibility allowed through LP14 (Shopping Frontages) which would enable the use of vacant ground floor premises. The restriction to 'main town centre uses' does not allow flexibility for the use of long term vacant units for non-town centre uses. What is meant by 'majority' – this lacks evidence. 'Open to the public' is not a land use planning policy matter and goes beyond the scope of a neighbourhood plan.</p> <p>Paragraph 5: It is unclear what is meant by 'permanent loss' and what constitutes 'retail' for the purposes of applying this criteria, for example is this Use Class A1 (shops) only or all A Class uses? However, the requirement in criteria 3 for alternative provision to be within the NDP area could be detrimental, for example, if there is a suitable alternative just beyond the boundary of the NDP area. The location requirement set out in Local Plan policy LP48 (Community Facilities and Services) requires alternative provision 'to serve the local community which is in an equally accessible location'. If retained, guidance on what evidence an applicant would be required to provide in terms of complying with Draft Policy 9 part 1 criteria 3 and 4 will be necessary.	Noted. Who would make these judgements and on what basis? This point should perhaps be better placed and evidenced in Draft Policy 1 or 2.</p> <p>Point 9: This point repeats Local Plan policy LP21d (Highways and Access). The word ‘must’ is discouraged in planning policies. It is unclear what is meant by ‘sufficient’. The council does not have adopted parking standards but does have parking guidelines. Point 15 is too restrictive as off street parking may be acceptable. Clarity is required as to what may be a suitable surface material. For example, setts may not be compatible for people with mobility issues or visual impairment.</p> <p>Suggested change: “New developments <del>must</del> <i>should</i> provide <del>sufficient</del> off-road parking provision in line with <del>Kirklees Council’s adopted parking standards (see Appendix 4)</del> <i>Local Plan policy LP22 (Parking) and the council’s latest guidance on highway design</i> to ensure schemes do not contribute to further on street parking.”</p> <p>Point 16: This point is unreasonable. It is not clear if this relates to new areas of communal parking (also covered in points 13 and 17). Also, screened courtyards may not benefit from natural surveillance.</p> <p>Point 17: This repeats point 13. It is unclear what is meant by ‘extra and new’. Development of this nature is unlikely to be consistent with the conservation objectives for these sites. In addition, promoting 'limited wind turbine development' may also be in conflict with NPPF (para 151b) and NPPG (Renewable and Low Carbon Energy paragraphs 005 and 032). Sport England	All		General	Comment	<p>Government planning policy, within the <b>National Planning Policy Framework (NPPF)</b>, identifies how the planning system can play an important role in facilitating social interaction and creating healthy, inclusive communities.</p> <p>Encouraging communities to become more physically active through walking, cycling, informal recreation and formal sport plays an important part in this process. In line with Par 97 of the NPPF, this takes the form of <b>assessments of need and strategies for indoor and outdoor sports facilities</b>. A neighbourhood planning body should look to see if the relevant local authority has prepared a playing pitch strategy or other indoor/outdoor sports facility strategy. Gladman Developments Limited 1.1			General	Comment	<b>Holme Valley Neighbourhood Development Plan</b> This section highlights the key issue that Gladman would like to raise with regards to the content of the HVNP as currently proposed. It is considered the requirements of national policy and guidance are not always reflected in the plan. Gladman have sought to recommend a modification to ensure compliance with basic conditions.	Noted.	No change.
1.2	60		Policy 2	Object	Policy 2 sets out a list 13 design principles that all proposals for residential and commercial development will be expected to adhere to.	Noted.  This Policy has been revised following consideration of comments submitted	No change.

					<p>Whilst Gladman recognise the importance of high-quality design, planning policies and the documents sitting behind them should not be overly prescriptive and need flexibility in order for schemes to respond to sites specifics and the character of the local area. There will not be a 'one size fits all' solution in relation to design and sites should be considered on a site by site basis with consideration given to various design principles. Gladman therefore suggest that more flexibility is provided in the policy wording to ensure that a high quality and inclusive design is not compromised by aesthetic requirements alone. We consider that to do so could act to</p>	<p>by Kirklees Council and the PDNPA.</p> <p>The Policy allows for a degree of flexibility but aims to promote high quality design which respects the local context and unique and distinctive character of the NDP area.</p>

1.3	101		10 – Protecting local green space	Object to Local Green space number 2 (Scholes Sandygate Fields)	<p>Policy 10 identifies 4 tracts of land as potential Local Green Space designations. The designation of land as Local Green Space (LGS) is a significant policy designation and effectively means that once designated, they provide protection that is comparable to that for Green Belt land. As such, the Parish Council should ensure that the proposed designations are capable of meeting the requirements of national policy if they consider it necessary to seek LGS designation.</p> <p>The Framework 2018 is explicit in stating at paragraph 100 that <i>'Local Green Space designation will not be appropriate</i></p>	<p>Noted. The NDP refers to the criteria and wording set out in the NPPF in relation to Local Green Spaces.</p> <p>Not accepted.</p> <p>The Parish Council wish to retain this area in the NDP for the Examiner to determine.</p>	No change.

1			Comment	Banning all HGVs from the town centre	Noted.  This is not a planning policy matter.	No change.
4			Comment	Please do something about the cheap and nasty, bright. white LED street-lights. The night-time character of the valley has already been destroyed, yet public lighting is not even mentioned in the NDP. My suggestion for improving the landscape character of the area is to leave it alone. As the NDP is not allowed to contradict national policy I would expect it to make no difference to the ongoing urbanisation. The NDP appears to be a guide for developers.	Noted.  Lighting is addressed in revised Policy 2. This sets out that "Light pollution should be minimised, and security lighting must be appropriate, unobtrusive and energy efficient."  Policy 4 also addresses lighting in shop fronts.  The policies in the NDP should be used to guide development and are required to be positively phrased.	No change.
5			Support	That sounds great , it's so important to keep the sides of the valley unbuilt on otherwise our lively town will loose its	Noted.	No change.

9			Comment	More tree planting within schemes, not to “normally retain important trees”. In the scheme recently built in Scholes the original plan had fewer houses and more tree planting - this ended up as ore houses and not a single tree/ grass kerb. We need more houses but let’s build these schemes sensitively and make them beautiful like their surroundings and not just prioritise the profits of the builders for once.	Noted.  Retaining trees and tree planting is encouraged in revised Policy 1.	No change.
15			Comment	Reduce new build in the Holme Valley	Not accepted.  The NDP cannot propose less housing than the Local Plan which sets out the strategic housing requirement for Kirklees area and identifies a number of housing site allocations.	No change.

This is not a planning policy matter - refer to Parish Council for possible action working with other groups.	No change.
21			Comment	Stop all building on green field sites and the plague of wind turbines	Noted.  The NDP cannot propose less housing than the Local Plan which sets out the strategic housing requirement for Kirklees area and identifies a number of housing site allocations.  The NDP cannot promote wind turbines in line with national planning policy (unless certain circumstances apply).	No change.

31			Comment	Ensure the Green Belt is preserved and ensure no building on areas that would have a deleterious impact on visual impact to the landscape.	Noted.  The Green Belt is protected in national and local planning policy.  The NDP cannot propose less housing than the Local Plan which sets out the strategic housing requirement for Kirklees area and identifies a number of housing site allocations, some of which	No change.

36			Support	I fully agree with the intention of maintaining and enhancing the green areas, (the trees and hedgerows) and using local materials to retain the historic and individual character of the Holme Valley with its dry stone walls, its paths and traditional pedestrian ways.	Noted.	No change.
42			Comment	Riverside paths should be promoted and extended to form a continuous route. Especially where new developments are along rivers.	Noted.  Policy 11 has been revised and sets out that "Developments adjacent to the River Holme should consider access improvements to the river Holme footpath network."	No change.

55			Comment	This should reflect a broader importance of our landscape - not just to preserve it but to maximise its environmental value in light of the climate emergency ie. restore peat bogs, plant trees etc.	Noted.  The NDP supporting text will be reviewed and updated taking account of the climate emergency declaration.	No change.

Rewilding projects should be prioritised and supported throughout the valley.	Noted.  New biodiversity policy has been added as Policy 13 'Protecting Wildlife and Securing Biodiversity Net Gain'

19			Comment	Where there are to be new developments be mindful of the size. The new building at Hade Edge has completely swamped the original vernacular architecture.	Noted.  The Kirklees Local Plan allocates a number of strategic housing sites in the NDP area and these already have an indicative housing capacity figure. The NDP policies should be used to inform future applications which may come forward over the plan period. New (non-allocated) sites are likely to be relatively small in scale as they will only be acceptable in areas not protected by the Green Belt or PDNPA policies.	No change.

60			Comment	3.1 Whilst conserving local non-designated heritage assets is important, this policy should not be used to preclude renewable energy development and home energy efficiency measures, given the Climate Emergency recently declared by the Parish Council. I wish to see an overarching statement to this effect in the HV NDP	Noted.  Protection of heritage assets has to be balanced against other planning considerations including energy efficiency. Energy efficiency is addressed in Policy 12.	No change.
63			Comment	As at the first question. Stop developers raping the fields which are left purely for monetary gain so that there are green areas, planted with new trees.	Noted.  The Kirklees Local Plan identifies a number of site allocations for new housing to meet the assessed need. The NDP will provide a positive planning framework for other proposals which may come forward and promotes brownfield development and conversions of existing buildings in Policy 6.	No change.

5			Comment / Support	I will be a shop owner come September. I am a visual merchandiser and understand the importance of shop frontage. window displays and signage make an enormous difference to the look and feel of the high street. Damaged rotting and falling apart signage like the little shop next to the picturedrome should be addressed by the council. It looks terrible! Also the shop local signage should be changed back to how it was before they stuck a blue tacky sign over the beautiful original sign they had. It makes the high street look tacky and unappealing. It's very important to keep visitor numbers up which in return boosts economy in the area. If the shops don't look appealing numbers will start dropping.	Noted.  Policy 4 has been amended following consideration of comments submitted by Kirklees Council. The Policy recognises the importance of attractive shop fronts and the role that traditional shop fronts can play in making a shopping area attractive to visitors and residents.  Maintenance and repairs are a matter for building owners and occupiers.	No change.

The NDP will become part of the development plan and used to help determine planning applications once it has been through examination and a referendum and has been made by Kirklees Council.	
7			Support	4.6 Design in Town and Local Centres and Public Realm under "Design in Town and Local Centres and Public Realm" there is nowhere that mentions about disability access into shops and community buildings. There should be an amendment added to page 69, 3. Replacement of shopfront. This should read where ever possible when shopfronts are changed there should be a consideration for disabled access. There may also be other sections of the neighbourhood plan that needs to be amended in relation to disability access. As	Accepted. 				<p>we know Square Peg have been and done a disability access assessment of Holmfirth and I strongly believe that this should be added or lay alongside the neighbourhood plan. I will be contacting Square Peg to update them on my findings. See Page 108. Page 108 4.10.7 Disability is mentioned in relation to wheelchair access along the street some pavements but nowhere does it mention about disability access into shops and facilities around Holmfirth and the Holme Valley. If I'm right in thinking the neighbourhood plan is for all towns and villages including Honley which also has access issues along the pavements and roads so section 4.10.7 needs amending to cover all areas of the home Valley and not just Holmfirth and to cover shops and public facilities. 34			Comment	I think para (d) could be better worded. It should encourage individual design, but not specific issues such as different stallriser heights. For example, where there are two shop fronts on one building (and there are examples of this in Holmfirth), although they need not be identical, such elements as the stallrisers & the fascias should be in alignment. 36			Comment	I would wish for the outlined policy to be fully implemented and for ongoing discussions to be encouraged so that the overall look of shop fronts be synchronized to give a unified feel to rows and streets of shops. This would greatly improve the visual impact of the villages and towns within the Holme valley.	Noted.  Once the NDP has been made the planning policies should be used by Kirklees Council to help determine planning applications.	No change.

1			Comment	The impact on school places and traffic increase should be a major consideration before planning is granted.	Noted.  This is a matter for Kirklees Council and is addressed in the Infrastructure Delivery Plan.	No change.
2			Comment	Houses are far too expensive for young local people - the majority of new builds are £300K plus and are out of the reach of young people born and bred in the Holme Valley so they are forced out of their home town. There should be a scheme to help young local people get on the housing ladder in the Holme Valley. The number of young families in the area (children under 7) seems to drop year on year - this has a knock on effect for local schools who struggle to fill Reception and KS1 classes causing budgets to fall even further.	Noted.  The NDP recognises that affordability is an issue in the NDP area. The Kirklees Local Plan includes a Policy requiring contributions towards affordable housing and so this is not duplicated in the NDP.  Letting homes as holiday cottages does not require planning consent.	No change.

We need houses but why are the developers building the same d stuff, packing in houses with little thought to the environment, smallest gardens possible and lack of public green spaces. 37			Comment	Parking standards for housing should be set within the NDP as a minimum requirement in all cases, rather than to refer to Kirklees guidance or any other reference point. (you could just delete this sentence because it is covered in the following section "house types and sizes")	Noted.  The Policy has been amended following comments from Kirklees Council and refers to the most up to date needs assessment for more detail.	No change.
55			Comment	We need to break the cycle of developers building 4+bed detached houses which suit commuters rather than providing smaller houses for young and old and those needing to downsize. 70% local people said they want more affordable and smaller houses but all the new ones being built are large so are out of kilter with public demand. 				Developers also seem able to buy their way out of commitments to build smaller houses. The quality of the new houses is also often poor - they should all have solar panels / ground source heat pumps and provide the sustainable design required in this climate emergency. We need to break the leverage of builders by supporting different ways of construction such as community builds and self-builds.		
56			Comment	This policy should reflect sustainability and inclusion of solar panels / renewable energy. The design of new estates should also encourage more walking as well as provide green spaces for play / trees (not just private gardens) - the new development in Netherthong seems not to have a footpath through to Deanhouse thereby making an unnecessarily long walk from the end of the road up to the centre of the village / school. The real and most effective solution to these problems is not to build more large and expensive homes within the Valley, but rather to address the evident undersupply of homes that are suitable for: (a) younger people, many of whom wish to live and work in the area, but are unable due to unaffordable rents and house prices (b) older people, many of whom have particular social and health care requirements. An active stock management solution is all the more appropriate given the increasing number of elderly in the population of the Valley, and it has the considerable merit of making appropriate housing provision, as well as releasing existing affordable family homes that can be rented or purchased by those</p>

This NDP section is too general and needs strengthening as it currently does not address adequately:</p> <p>1.1. The changing needs of the local population in the HV</p> <p>1.1.1. It just accepts the housing allocations given by Kirklees in the Local Plan, 27 sites – it does not assess, challenge or prioritise any of these allocations.</p> <p>1.1.2. it does not assess or accommodate the changing demographics and impact on local housing need, particularly the housing needs for an ageing population, the need to retain the young people who want to live and work here, the needs of the increasing numbers for homeworkers who do not want to commute, the needs for more communal or shared living homes.</p>

It does not follow the basic and widely accepted principle of ACTIVE STOCK MANAGEMENT, whereby the local community can influence its housing needs rather than it being left to the market, i.e. private developers, to decide what houses are built and where.</p> <p>1.3. Community-led housing (CLH) – community self-build schemes, housing associations, housing co-operatives, co-housing schemes, self-help housing etc.</p> <p>1.3.1. It does not mention of community-led housing in the document, a growing and increasingly important sector of the housing market for building the future homes we need.</p> <p>1.4. 				<p>1.4.1. It does not yet address or make any recognition of the recent Climate Emergency commitments made by the Parish Council on 25th March 2019, and its impending Action Plan. 2. Community led housing (CLH) is increasingly important – this third sector involvement which mobilises community resources and increases community cohesion, provides another route for building homes for the people in our community. Also, CLH is predominantly about affordable housing which is in short supply. The NDP should include a policy to support and encourage community led housing. See reference below for ways in which the NDP could do this:</p> <p>2.1. The Planners guide to Community-led Housing document offers advice and guidance about how an NDP can be written to encourage and facilitate CLH. The guide</p>

Nationwide Foundation and DEFRA provided funding for the guide's development. See link <a href="https://communityfirstyorkshire.org.uk/plannersguide/">https://communityfirstyorkshire.org.uk/plannersguide/</a>. 				<p>3. Active Stock Management  3.1. Local housing need - the NDP should include a policy and provision for 'active stock management', to address the ongoing housing needs of the Holme Valley community, reflecting the mix of housing needed. The NDP should adopt an intelligence - based, active stock management approach, which looks at the detailed components and age specific issues which determine housing need, demand and supply, rather than regarding housing need as a uniform aggregate of unmet demand. This active stock management approach should also be calibrated to reflect the needs of an individual place in order to conform to the requirements of the Kirklees Local Plan (Policies PLP1, PLP2 and PLP11). It is also evident that the demographic and socio-economic circumstances of the Holme Valley require the use of a method of</p>

Community voice - the Parish Council should be given have an ongoing role in the NDP in relation to housing policy and active stock management as the 'voice of the community', as part of the active stock management practice for the ongoing housing needs of the Holme Valley area. This voice is needed to counter the self-interests of developers and landowners, to ensure that community needs are balanced against those of the market. Note this is not the same role as that of the Planning committees. It is</p>

Phased release of sites – the NDP should allow for a phased release of sites, preferencing brownfield sites over greenfield sites, small &amp; medium sites over large sites; extant permitted sites over unpermitted sites, to ensure land is released in an orderly and appropriate manner, reflecting community needs, and minimising the potential for land banking of sites by developers and speculators.</p> <p>4. The NDP should confirm that at least 20% of all housing units on market housing sites should be affordable</p> <p>4.4. The NDP should confirm that planning permission will be granted exceptionally for affordable homes in the small free standing rural settlements within the Holme Valley area on land which would not normally be permitted for housing development, but where there is otherwise little proposal of meeting local need (Rural Exception Sites). These affordable homes should generally be for rent and should remain affordable in perpetuity.</p> <p>5. Work Live homes 5.1. The NDP should include</p>

More specific provision should be detailed for suitable Work/Live homes where home workers can both live and work in their dwellings.</p> <p>6. Elderly people homes</p> <p>6.1. The NDP should include an assessment of need and also a specific policy statement on homes for elderly people, 65+, including encouraging CLH as one of the routes for delivery. It is known that a lack of provision for this type of housing, locks in larger family homes in the Home Valley, where older people are living but are reluctant to move out because of the shortage of suitable smaller housing to suit their needs.</p> <p>6.2. 62			Comment	I would like to have seen a greater emphasis on the encouragement of a shift towards social and affordable housing, even to the extent that we encourage a definition of such more ambitious and more appropriate than that provided by the NPPF and adhered to in the NDP. 30			Support	Provision of homes/habitat for wildlife	Noted.	No change.
34			Support / Comment	The principle is good, but I wonder why these sites have been selected and on the basis of what survey. The Sandygate Fields are not open to public use. And there must be other sites in other parts of the district that should also be protected.	Noted.  The LGS were promoted through the NDP public consultations and assessed according to the criteria set out in the NPPF.	No change.
35			Support	I support the inclusion of these sites as local green spaces as they represent important places in the communities and provide context of our rural past.	Noted.	No change.
42			Comment	This space should be better maintained and made more useable by the public to further justify protection.	Noted.	No change.

44			Comment	Green Space in Upperthong is disappearing fast - this must be addressed soon. Dean Road seems to be at risk.	Noted.	No change.
48			Comment	<p>Wooldale Chapel Field is like a little green lung for the residents and for the 2 pre-schools located there. It also means that there is less traffic at a tricky junction than if it were built on. It helps to retain the historical character of the village.</p> <p>Hade Edge Gateway is often played upon by children on bikes and keeps them off the fast road. Again it is the open entrance to an old village which is already experiencing radical building. It preserves the nature of the village.</p>	Noted. 58			Comment	We feel that particularly areas within the Conservation area should be protected from building.	Noted.	No change.
59			Comment	No, but I would like to add all of the fields to the west of Netherthong (up to the boundary with Meltham golf course to the list. These are rich in wildlife (hares, hedgehogs, birds, bat feeding area, wild flowers, etc.) and should be protected from development.	Noted.  Local Green Space designation can only be used for areas that are local in character and not an extensive tract of land.	No change.
63			Comment	Please protect whatever green space is left above Upperthong from Greedy farmers who have already made a mint fro selling fields they have inherited and can sell moe for development. We need green spaces for the village, and also no more strain on highways and the local school. .	Noted.  Local Green Space designation can only be used for areas that are local in character and not an extensive tract of land.	No change.
64			Comment	The land was sold under the enclosure act, but has not been walled (as was required	Noted.	Map amended to reduce area and justification made clearer.

In the 1960s, this area was used by WRCC for tipping road gravel. The central area has been in constant use by vehicles accessing Bent Lane. It has been used since 1948 by vehicles from Longley Farm and is vital for access as there are no viable alternatives for large vehicles.		
65			Comment	Dunford Road is already getting busy and crowded with all the traffic unless something is done about the traffic first then development should not be allowed to continue, and so should be protected from development.	Noted.	No change

All we need is no lorries and there us definitely no need for most of them to even be there early intervention at points further away would ensure this nightmare doesn't exist.	Noted.  The NDP cannot address the Holmfirth road scheme.	No change.

The Policy has been reworded following consideration of Kirklees Council's comments and now prioritises pedestrians and cyclists.	No change.

22			Comment	Use more frequent mini buses to feed a rapid direct Holmfirth to Huddersfield bus service.	Noted. This is a matter for Kirklees Council.	No change.
25			Comment	More should be done to prevent large vehicles using the Holme valley as a bypass- this would improve congestion. We need to be more proactive in supporting ev charging - we are still a rural area, with many routes not having public transport, and many residents unable to use bicycles. I support the ideas around park and ride/walk - include incentives for parking and ev charging	Noted. This is a matter for Kirklees Council.	No change.

				appropriate for people living in the valley by seeking creative solutions addressing climate change, pollution, flooding.	The NDP has a strong emphasis on sustainable development but this is a matter for Kirklees Council.	
34			Comment	<p>I worry about the wording of point 4. The issue of widening roads &amp; footpaths should not be a matter for highways engineers only!</p> <p>The issues of visual amenity and a sense of place must also play a part. When I was involved with new developments, many years ago, I found it almost impossible to get the developers of new housing schemes to think of anything but standard layouts with dwellings set out 70feet apart in straight lines. The idea of creating attractive spaces by the setting back or forward of suitably designed buildings seemed impossible for them to grasp. And, seeing what is being built today it</p>	<p>Noted.</p> <p>4 has been deleted.</p> <p>Visual amenity and sense of place are addressed in Policy 5.</p>	No change.

				seems no progress has been made.		
36			Support	I support the aim to promote balance in private and public transport, cycling and walking. Cycle lanes would be an advantage and would promote the use of the bicycle and especially the electric bicycle as an alternative to the car as a general mode of transport.	Noted.	No change.
42			Comment	Need to reduce through traffic in Holmfirth especially HGVs. Sat navs are directing unfamiliar vehicles along this route. Speed restrictions should be enforced and speeds reduced on transpennine routes to reduce this. There should be more speed enforcement and traffic calming especially around school areas. Consider 20mph zone in Holmfirth similar to Meltham.	Noted. This is a matter for Kirklees Council.	No change.

Consultee Ref. No.	Page No.	Para. No.	Support / Object / Comment	Comments received	Parish Council's Consideration	Amendments to NDP
43			Comment	Move the zebra crossing from outside Lloyds in Holmfirth and move it further up Station Road near Holmeside Gardens - this will help the traffic flow better.	Noted.  This is a matter for Kirklees Council.	No change.
44			Comment	It is good that the "2019 Holmfirth Town Centre Access Plan" is being reconsidered. However, three "pinch-point" areas to consider are; 1. Back Lane/Station Road, Holmfirth junction - make one way down hill (towards back of Co-op) with no right turn off Station Road. 2. Hollowgate - One way westbound, no HGV access and no left turn at bottom of Rocher. 3. Main junction box in New Mill redesigned. The removal of zebra crossing at bottom of Victoria Street, Holmfirth could also improve flow of traffic.	Noted.  This is a matter for Kirklees Council.	No change.
48			Comment	Please keep pedestrians in mind. I walk to Holmfirth	Noted.	No change.

				on a daily basis and there are some dangerous parts to walk along- even if you are on the pavement ( eg when walking by the Mason's Hall on station road where the traffic space narrows because of parking- you have to watch out for lorry wing mirrors and larger lorries coming up on the pavement).		
53			Comment	delete reference to "uninspiring, standard highway engineered standard" in paragraph 8, which is a value judgement. Introducing a "sense of enclosure" does not sound like a particularly good idea. Consider deleting paragraph 8 altogether.	Noted.  This is a matter for Kirklees Council.  The Policy has been amended and part of the wording deleted.	No change.
54			Comment	Maybe consider how you identify main routes eg some roads are not classed as main roads, but have become major routes and rat runs, including being used by large lorries/HGVs. Introduce more double	Noted.  This is a matter for Kirklees Council.	No change.

55			Comment	We should aspire to reduce HGV movements and have signage before people reach the towns discouraging HGV access. We must also actively stop cars / buses / taxis from idling their engines as they have done in cities such as York.	Noted. This is a matter for Kirklees Council.	No change.
56			Comment	Encouraging 20mph in all our town and village centres is important. Road markings in our conservation areas should be more muted eg. thinner yellow lines so they are less visually intrusive. Discouraging HGVs which are not local businesses and are just using the valley as a through route is important. Priority boxes for cyclists should be provided at key signalled junctions particularly on the main roads near schools so children can	Noted. This is a matter for Kirklees Council.	No change.

				cycle more safely to school. Station Road to Holmfirth High School for example could have a marked bike lane going up the hill from Holmfirth and potentially a different access to the school to encourage more children to cycle to school. New developments should include footpaths and connectivity into the centre of villages etc. The hill up Greenfield Road to the Ford Inn should be reduced in speed to 50mph to make it safer.		
57			Comment	Ensure the current proposed traffic improvements are in line with the local neighbourhood plan and are designed to enhance the town and its amnities and not just improving Holmfirth as a commuter ratrun.	Noted.  This is a matter for Kirklees Council.  The Policies in the NDP promote active travel and prioritise pedestrians and cyclists.	No change.

				with high kerb barriers, along all the main highways linking Holmfirth and New Milll to Huddersfield to encourage more people to cycle to and from Town for work and leisure. Cycling should be prioritised over car use to promote greener living. Cycle and renewable energy (electric plug-in) car parking spaces should be provided in all car parks, at least equivalent in number to the number of car parking spaces. The car parking for all new developments should be provided with electric plug-in points to encourage the use of electric vehicles.		
60			Comment	11.1 The NDP and Policy 11 should include measures to support the Climate Emergency recently declared by the Parish Council. The two major changes will be the switch from fossil fuelled mot vehicles to clean energy	Noted.  This has been reviewed by the Steering Group.	No further change.

				vehicles e.g. EV electric cars, and the switch from using personal transport to public transport. The NDP and Policy 11 should promote and support these changes. E.g. facilitate installation of EV charging points in both private and public road spaces.		
63			Comment	As at 1) Stop HGVs and massive articulated lorries getting into the town centre and up Greenfield Road, which is like a motorway, by ensuring signage/deterrents so that M1 and M62 is used instead.	Noted. This is a matter for Kirklees Council.	No change.
66			Comment	In any new suggested improvements for the traffic situation in Holmfirth, a full public consultation should be held, as was held for the previous one which was ultimately rejected. It also needs to take into consideration that the historic Hollowgate needs	Noted. This is a matter for Kirklees Council.	No change.

68			Comment	F. Health and wellbeing. Until you get rid of HGV's altogether, by using signage from the M1 to divert HGVs to the M62 to reach Lancashire, then we shall have the current intolerant air pollution for ever more. Holmfirth is a small mill town and it was never meant for such heavy and articulated vehicles, some of which currently block 3 lanes in the town centre.	Noted.  This is a matter for Kirklees Council. Consultee Ref. No.	Page No.	Para. No.	Support / Object / Comment	Comments received	Parish Councils' Consideration	Amendments to NDP
55			Comment	The strands of the climate emergency should be reflected through the document with every policy considering sustainability and how we can address this. Renewable energy sources should be mandated for new developments and every effort be taken for sustainability to permeate every element of the valley from house building to traffic.	Noted.  The Steering Group are considering the climate emergency and implications for the NDP. The NDP has been revised throughout to strengthen climate change related policies and actions.	No further change.
56			Comment	The new Climate Change action plan should be read in conjunction with the NDP to see if the themes within it are appropriately included as this has evolved during the lifetime of the NDP development and it is important that the NDP facilitates some of the Climate Change actions in a complementary way and more importantly does not block them. 1			Comment	I've answered yes but it was a close call. I don't agree with this approach to local policy-making, but it's a worthy effort.	Noted.	No change.
4			Comment	Yes but only if amendments are made to it	Noted.	No change.
5			Comment	It's great!	Noted.	No change.
6			Comment	Too many "if possible" and "normally" at the beginning of sentences allowing developers to wriggle out of things. Also not enough priority on the environment, sustainability and green spaces. Houses can be built which prioritise these things - we need to aim higher in terms of what we want from our housing in the future and aim for award winning passive housing developments in this valley.	Noted. Planning policies have to be flexible and not overly prescriptive.	No change.
8			Comment	Generally. Not happy with more housing	Noted.	No change.
14			Comment	I am concerned that it will be dismissed by planning in favour of targets for numbers of houses built.	Noted.	No change.

30			Comment	There is a financial benefit in doing so!	Noted.	No change.
32			Comment	The plan provides the foundation for ensuring appropriate development in the Valley i.e. development that reflects our past and supports our future as one of the most stunning and distinctive places in the UK	Noted.	No change.
33			Comment	We have a unique opportunity to have a real say in the development of our local area and direct the future of the Holme Valley in the way local residents want our community to evolve.	Noted.	No change.
42			Comment	Great work. I can see how this will make the Holme Valley a great place to live for many years to come	Noted.	No change.
43			Comment	It is necessarily complex but nevertheless excellent	Noted.	No change.

4			General	Comment	I see these plans as a means of rubber-stamping what's going to happen anyway. "Neighbourhood plans, and orders should not promote less development than set out in the Local Plan or undermine its strategic policies." Enough said.	Noted.	No change.
5				Comment	It seems that too many identical looking housing estates are allowed to be built on what was a green field I don't understand how this is allowed to happen ?	Noted.	No change.

40				Comment	It is well thought out and comprehensive. I have tried hard to find areas where I could improve on it but I have been unsuccessful!	Noted.	No change.
43				Comment	they key thing is to be sensible when building new houses as not everyone wants or can afford a 5 bedroomed executive home. What about young families who need an affordable 2 bed starter home - where are they? The focus needs to be on the community and not the profit of the builder. And, be sensible with regards to access - some roads are impossible to get down due to ridiculous parking and lack of double yellow lines and traffic wardens.	Noted.	No change.

48				Comment	Thank you for the work and the thought that has gone into this plan.	Noted.	No change.
54				Comment	Having said all of the above I hope it is adopted and then used. My fear is that historically (and I know we're talking about the future here) permissions haven't been monitored and enforced, so some people have got away without redress. This mustn't happen, going forward, so the resources to monitor and enforce must be there, otherwise all of this is pointless. Please follow it through!!!!!!	Noted.	No change.

In order to meet the stated aim of being 'carbon neutral by 2030' all new development must be carbon neutral from the outset, both in terms of the build and the future occupation/use.		
64				Comment	It is really very hard to read the plan and fill out this questionnaire.	Noted.	No change.
68				Comment	Firstly your page 5 how to comment is ambiguously worded and you give a link for queries which I am using. I do not see in your index a page for the questionnaire which you also refer to. This, together with the huge Raft of information is probably why you have so few replies. 					<p>cannot be done as Kirklees Planning passes just about everything as its criteria is so lax and so huge meaning that any development is passed in order to get more council tax revenue which the Holme Valley can generate. The Holme Valley is already over-developed and councillors from other areas pass developments in the Holme Valley area as they do not care, so long as it is not their own. I have seen the Chair of the Planning Committee actually give directives to councillors to pass a development which has been objected to and the councillors just do as they are directed. As another example, 2 houses at Burnlee just below the school were built too high but nothing was done to correct this. The Uppershong area is overbuilt and its highways are</p>

The farmers who own the remaining fields at the top of Upperthong will simply sell to developers as and when they please and more building will occur. Highways always says the roads are adequate and clearly they are not.</p>		
69				Comment	<p>My reaction to this is the same as to the previous version: I have trouble with the vision statement and can't properly get past that. 					<p>term of the plan? There are several options: - A population of largely working age people - A population servicing the tourist industry - A population of non-working people. These have different requirements. If you have people of working age then either you have to balance provision of workplaces against homes or improve transport links. If you see a need to provide balance you need to ask how this is to be done given that years of development have trashed most of the places where people were employed - those "brownfield sites" were the reason why the vast majority of people living in the valley could be employed there back in the '50s. Turning them over to housing has made the valley commuter country. If</p>

					<p>commuter country is what you see as the future you have to face the fact that (a) it has sustainability problems and (b) needs a major upgrade to roads (rail is a distant memory) at whatever cost that brings for the countryside. If you see tourism as the future there needs to be an abrupt halt to house-building. The countryside is the main resource and more building over it is going to destroy it. If you have a non-working population then you need to think about social provision. You need to switch development to social housing and look at provision of health services if that population is seen as retirees. At present the main hospital provision is on the far side of Huddersfield. Even the public transport within the valley would need to be fixed - we have our</p>

Great care has been taken in the past to light Holmfirth sympathetically but the policy has changed. Why was lighting once an important enough issue to warrant incurring extra expense for flattering and pleasant lighting in the centre of Holmfirth, but is now not important enough even to be mentioned in the local plan? 54				It seems common sense, but at the end it still says "would need a more detailed Environmental Assessment" so was this a pointless exercise at this stage?
