

# Could you take the bus challenge and leave the car at home?

Did you know? If you swap a 10 mile car journey for the bus just once per week it would save over 50kg of carbon per year!

Holme Valley Parish Council contributes funding annually to the Stotts buses in the Holme Valley. Your support enables the services to thrive, and grow, and helps in making the Holme Valley cleaner and less congested.

By regularly using the local bus services you can:

- Reduce the use of fossil fuels and cut down on harmful vehicle emissions
- Alleviate traffic congestion in the Holme Valley
- Save money on parking fees
- Take a breather and unwind by slowing down your pace of life
- Connect with fellow community members
- Contribute to combating the climate crisis
